

SAHPRA MEDICINES ONLINE DIRECTORY

TOOLKIT FOR PRECRITPTON ONLY (S3 – S6) MEDICINES

Introducing the SAHPRA Medicines Online Directory Phase 2 for Rx Medicines

SAHPRA launched the OTC Online Medicines Directory in June 2022. Please visit:
www.medsinfo.sahpra.org.za

The purpose of the Online Medicines Directory is to provide patients, consumers, and healthcare providers with a single, trusted source of information for all medicines approved by SAHPRA.

Phase 1 was to include all Schedule 0–2 products (OTCs).

Phase 2 which is underway is to include all prescription only medicines (S3 and above). Once completed, the site will undergo an artwork change and have an OTC and Rx section. The URL www.medsinfo.sahpra.org.za will stay the same.

SAHPRA is working towards zero rating this website.

SAHPRA Online Medicine Directory Rx Toolkit

This toolkit provides Market Authorisation Holders (MAH) activation guidance.

The toolkit provides essential creative guidelines and resources to ensure consistency and alignment across all marketing and promotional platforms to effectively increase awareness and use of SAHPRA's Online Medicines Directory to all healthcare professionals.

All Holders of Certificates of Registration are encouraged to develop a Standard Operating Procedure (SOP) for this process to ensure that the correct QR code is consistently assigned.

Please direct all toolkit inquiries to:

SAHPRA:

- enquiries@sahpra.org.za

Industry:

- Nicola Brink at nicola@selfcareassociation.co.za

Medicines Online Directory Support:

Creative Guidance & Key Visuals

Key Visuals

Three visuals have been provided. One of these visuals must be included on all prescription-only promotional material, such as detail aids, professional journal advertisements, and similar items.

The first visual includes a QR code generated directly from the specific product or medicine on the site.

The second features a QR code that links directly to the MedsInfo landing page.

The third provides only the URL link to the MedsInfo site.

If you are promoting a prescription only medicine, you must ideally incorporate the QR code specific to your product—generated from the backend system into which you have access —into the artwork. This artwork will then be integrated into your promotional material.

Once generated, your QR code remains unchanged, even when updates occur.

VISUAL ONE

Below is the QR code generated directly from the specific product or medicine on the site.

BY EXCEPTION

By exception, you may use the QR code provided below, which currently links to the OTC Online Directory. By the time of launch, this will become the combined OTC and Rx Online Directory.

FONTS

The primary font that must be used across all creative is the typeface called “Poppins”. It consists of various font weights as displayed below. Please see fonts [here](#).
